(54) Titre: COUCHE DE BLOCAGE BIOCHIMIQUE POUR ANALYSE PAR CRISTAUX LIQUIDES

(54) Title: BIOCHEMICAL BLOCKING LAYER FOR LIQUID CRYSTAL ASSAY

(57) Abrégé/Abstract:

A rubbed substrate structure for use in a liquid crystal assay device, includes: a biochemical blocking compound chemically immobilized on a surface of one side of a support forming a biochemical blocking layer; and a biomolecule recognition agent

(21) 2 394 966

(13) A1

(57) Abrégé(suite)/Abstract(continued):

deposited on the side of the support containing the biochemical blocking layer. The biomolecule recognition agent includes a recognition site capable of selectively recognizing a target species to be detected by the liquid crystal assay device. Additionally, drive a uniform anchoring of liquid crystals when the liquid crystals contact the side of the support containing the biochemical blocking layer. A method for preparing a rubbed substrate structure for use in a liquid crystal assay device, optical cells for use in a liquid crystal assay, liquid crystal assay devices, kits for use in a liquid crystal assay, and methods for detecting the presence of a target species using a liquid crystal assay device are also disclosed.
